

JAHANA SHERIN KJ

Software QA & Test Engineer | Software Developer (Entry-Level)

Thrissur, Kerala, India | 8714523029 | jsherin799@gmail.com | linkedin.com/in/jahana-sherin-kjba1442281

PROFESSIONAL SUMMARY

MCA candidate (2024 - 2026) with hands-on experience in manual and functional software testing, Python development, and full-stack web application projects. Skilled in test case design, defect reporting, and SDLC/STLC methodologies, with practical experience building and testing Python, Django, and React-based applications. Strong analytical and problem-solving skills, demonstrated across three independently built software projects. Seeking an entry-level Software QA / Test Engineer or Software Developer role to apply technical and testing expertise within a collaborative engineering team.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript (ES6+), SQL

Web Technologies: HTML5, CSS3, React.js, Responsive Web Design

Databases: MySQL, SQLite

Software Testing: Manual Testing, Functional Testing, Regression Testing, Smoke Testing, UAT, Test Case Design, Defect Reporting, SDLC, STLC

Tools & Frameworks: Git, GitHub, VS Code, Django, Flask

EDUCATION

Master of Computer Applications (MCA)

2024 - 2026

Nehru College of Engineering and Research Centre, Thrissur

Relevant Coursework: Python Programming, Software Engineering, Data Analytics, Database Management Systems, Web Technologies, Cloud Computing

Bachelor of Computer Applications (BCA)

2021 - 2024

Elims College of Arts & Science, Thrissur

Relevant Coursework: Programming Fundamentals, Computer Networks, Operating Systems, Database Systems, Software Development

PROJECT EXPERIENCE

Full-Stack Edge-Based DoS Mitigation and Real-Time Alert System

Jan 2026 - Apr 2026

Technologies: Python, Flask, Machine Learning, JavaScript, SQL

- Built backend services for network traffic analysis and anomaly detection at the network edge.
- Trained and deployed Logistic Regression and Support Vector Machine (SVM) classifiers to detect Denial-of-Service attack patterns.
- Designed an interactive real-time monitoring dashboard with configurable alert thresholds.
- Integrated logging and visualization tools to track network traffic and system alerts.

AI Copilot Chrome Extension

Aug 2025 - Nov 2025

Technologies: React.js, JavaScript, REST APIs, AI Integration

- Built a React.js frontend for an AI-powered Chrome extension supporting coding assistance and productivity tasks.
- Integrated third-party AI services via REST APIs to power real-time, personalized recommendations.
- Optimized UI performance and leveraged cloud-based backend services for scalability.

Orphanage Management System

Jun 2023 - Mar 2024

Technologies: Python, Django, MySQL, HTML, CSS, JavaScript

- Developed backend functionality and database architecture using Python Django and MySQL.
- Built administrator-facing interfaces to manage records, improving data accuracy and organization.
- Handled end-to-end data collection, validation, and storage for administrative records.

CERTIFICATIONS

- NPTEL - Cloud Computing
- Rhyphira Tech - Python Django Development

- Academic Project Publication Certificate, NECTAR
